- England
- Northern Ireland
- Scotland
- Wales
- Republic of Ireland

## All sectors

- NHS
- Government
- Further and Higher Education
- Professional Bodies
- Public Libraries
- Voluntary Organisations
- Patient Information

Health Library & Information  
Services Directory (HLISD)

- Provides a searchable online directory of UK local Health Library & Information Services and resources
- Enables “Find a Library” - browse the directory to locate services and key contacts
- Provides key information on Libraries and Information Services including opening times, access rights and special collections
- Puts libraries in control - giving Library and Information Services the power over their entry in the directory
- Library data can be manipulated and loaded or linked into other systems.

## How will it be kept up to date?

Entries are updated by a network of editors.

Editors are responsible for either a group of services or their individual library.

Editors are prompted at six-monthly intervals to check the currency of their entries.

With around 800 entries we are working to make HLISD the most comprehensive directory of its kind for the United Kingdom and Republic of Ireland. There are also over 1,000 contact names. New entries are actively welcomed.

## Would you like to help?

There are a number of ways in which you can help.

- If you know of any other services which should be added
- If you notice anything out of date
- If you think any particular entries are too limited on information
- If you work in one of these libraries and would be interested in editing the entry.

Please contact us at:  
[contactus.hlisd@gmail.com](mailto:contactus.hlisd@gmail.com)

## Who manages HLISD?

The Directory is a partnership between:

- CILIP Health Libraries Group (HLG) and
- The HEE Library & Knowledge Services Leads Group (LKSL)
